

**Town of Blue Hill, Maine
Request for Proposals
South Blue Hill Finger Float Project**

AMENDMENT #1

- 1) The Project Specifications and Float Design Documents, provided with the original Request for Proposals package as Attachment 1, is amended to replace the section labeled "Mooring Chain" with the following:

Mooring Chain

The floats shall be supplied with:

Qty	Description	Part Number (HM Order #)
1	Drum (200') of ½" ACCO High Strength Mooring Chain	ACC-MC-050-HG& (139930)
2	Drums (60' ea.) of 1" ACCO High Strength Mooring Chain	ACC-MC-100-SC& (733598)
4	5/8" red pin shackles WLL 3 1/4T	CBY-10-18473 (105403)

The part numbers and Hamilton Marine order numbers are provided to identify the product, the chain and shackles are not required to be supplied by Hamilton Marine.

- 2) Attachment 3 of the Request for Proposals shows six cleats mounted on each of the floats. These cleats should only be mounted on the outside (Blue Hill Bay side) of the outermost two floats. The inside edges of those floats, and both edges of the two innermost floats should, instead, each have 4"x4" painter tie-up "bars" raised at least 1.5" above the float decking. Both the 4x4 bars and the spacers to raise the bars above the float decking should be constructed from ACQ pressure treated lumber.
